LOVEGROVE

COMPLETE CONFIDENCE | EC581

YOUR COMPLETE CARWASH SOLUTION

Australia's carwash industry is growing rapidly, with many new-to-industry sites being developed, and more dealerships and service stations looking to add value to their offering. For the complete carwash solution, team up with Lovegrove, your full service carwash installation, service and maintenance partner. Drawing on decades of experience completing large-scale projects and developments, we have the in-house expertise to execute any automatic or self-serve carwash project with complete confidence.

MAKE YOUR PROJECT FLOW

Years of experience working on carwash setups has built the platform needed to take our service to the next level. We've assembled an expert team of fully trained in-house specialists to work on any project across Western Australia, from metro to remote sites.

Our electrical experience means we're extremely comfortable working in environments that mix water and electrical, and we have a hard-earned reputation for completing projects safely and successfully. Whether you're developing a unique carwash on a standalone site or incorporating a carwash into your operation, trust Lovegrove to get the job done.

HOW WE HELP YOU

We can design, supply, install, and maintain your entire carwash solution. When you use the Lovegrove multi-disciplinary offering, there's no need for you to contract out plumbers, electricians and civil operators. Lovegrove has all the synergies in place to complete the job. By coordinating a greater range of services from one highly experienced point of contact with excellent business connections, we take greater responsibility over the project to ensure it is completed efficiently, cost effectively, and to the highest standard.

DESIGN & CONSTRUCTION

We can design and install your entire carwash system, from hydraulics to vacuum cleaners, dog washes, vending machines, card upgrades, change machines and energy management solutions. Simply send us your plans and we'll analyse its viability, identify new ways to optimise your site, and advise on what can be achieved.

PROWASH AUSTRALIA

We are a preferred supplier of Prowash - Australia's number one supplier of carwash products and vehicle wash equipment. Their soap solutions, vending products and replacement parts are renowned for their reliability and durability, with Prowash iWash Self-Serve carwash equipment used in over 200 facilities nationwide. Prowash offers a Carwash College to educate operators on how to optimise the effectiveness of soaps and detergents, ensuring peak performance, minimal wastage and reduced operating costs.

PDQ VEHICLE WASH SYSTEMS

Lovegrove is a strong endorser of PDQ, a world-leading manufacturer of cutting-edge carwash equipment and technology such as LaserWash touchless carwash systems, and ProTouch in-bay automatic brush equipment. Ask about our cost benefit analysis to shed light on the profitability of PDQ machines against slower and inferior machines.

SERVICE, REPAIRS & MAINTENANCE

We work with carwash owners to service and maintain their existing systems and equipment. If you've installed your carwash system with Lovegrove, we can take care of all your software upgrades and maintenance requirements.

Our installers use only the highest quality soaps and self-serve equipment including pumps, reverse osmosis systems and more.

COMPLETE THE JOB

The Lovegrove carwash team works alongside our other divisions to deliver the complete project solution:

- Civil work (prepare your site for development)
- Electrical (install the wiring to power your carwash)
- Renewables (renewable solutions to reduce the incremental cost of your carwash)
