

CIVIL WORKS

**LOVEGROVE**

COMPLETE CONFIDENCE | EC581

# YOUR COMPLETE CIVIL SOLUTION

Need excavation or site preparation to install tanks, build a car wash, or implement a solar solution? There's no need to contract out your civil works. Leave it to Lovegrove and we'll integrate it all seamlessly in one cohesive process.

Our civil division has worked on upwards of 150 development sites across Western Australia in conjunction with the Lovegrove fuel and electrical divisions. By integrating your civil works with the same team delivering your project, you'll benefit from a greater respect for underground services, increased quality, reduced costs, and minimal mobilisation.

## GROUND BREAKING PARTNERS

Lovegrove has a decade of experience completing civil works. Our six trained and competent in-house operators have extensive experience working around tanks and fuel. They're motivated by tough challenges and driven to execute a smooth transition from site preparation to project installation, and beyond.

For us, it's about the big picture, not delivering a service in isolation. We have the proven ability to work alongside all of the project stakeholders of our commercial developments. It's a holistic approach that gives you greater control over your project, with the ability to manage costs by minimising removal and disposal of excavated materials. Our operators will integrate well with all trades during the construction process, ensuring the entire project will run seamlessly.

## HOW WE HELP YOU

We've invested heavily in large machinery and second tier heavy equipment. Our capabilities include earthmoving, excavation, compaction, concrete cutting, and everything in between. We front end loaders, large excavators, multiple mini excavators, compactors, rollers, skid steers and trucks, we are ready rapidly mobilise to your next project.

## SITE PREPARATION

Our experienced operators can cut and fill your construction site to specific levels in preparation for building slabs and roadways.

## COMPACTION AND TESTING

We verify all our works by coordinating third party compaction-testing services to verify the material has been compacted in accordance with desired specifications and methodology.

## DEVELOPMENT PREPARATION

We have the equipment and expertise to strip your land of trees, vegetation and debris, ready for development.

## EXCAVATION

Having completed over 150 projects in conjunction with our fuel division, our team is highly experienced in excavation for tank farms, underground infrastructure and assets.

## DEWATERING

We offer water management and pumping solutions, with the ability to assess soil conditions, then design, drill and install dewatering bore fields to meet your site's requirements, particularly when installing tanks.

## DUST SUPPRESSION

We can subdue fine airborne dust particles during subgrade preparation for construction and development sites to create a safer, cleaner, healthier working environment.

## COMPLETE THE JOB

Our civil works team is frequently deployed to work in tandem with the other Lovegrove divisions, adding value and streamlining processes on projects such as fuel system installation and car wash construction. Leave it to Lovegrove and we'll complete the entire project from concept to completion:

- Fuel systems (design, installation, calibration, maintenance)
- Electrical work (hazardous area and general electrical)
- Solar and renewables
- Carwash installation
