**LOVEGROVE**

COMPLETE CONFIDENCE | EC581

# YOUR COMPLETE ELECTRICAL SOLUTION

Lovegrove is your full service electrical project partner. We have decades of experience in completing thousands of electrical projects across Australia, from site upgrades to new-to-industry sites.

When you work with Lovegrove, you'll do so with complete confidence knowing you're in the hands of a highly skilled multidisciplinary team. Our in-house electrical professionals can complete general commercial electrical work, hazardous areas electrical, and high voltage work. We have a very diverse range of skills

With our head office in Western Australia, our regional office in South Australia, and contracting licences in all states and territories, we're confident of delivering commercial and industrial projects across Australia.

## POWERFUL PARTNERS

Our company has over 65 years of experience in the electrical contracting industry. Six decades and three generations driving our capabilities into the future. Today, we have the capacity to manage the entire process from the ground up. Whatever the challenge, we'll see it through.

Our electrical capabilities are vast, covering LV and HV electrical services. Safety is our top priority. We've forged a reputation as hazardous areas specialists, with the ability to manage the process of everything from design, consulting, auditing, inspections, installation and maintenance.

With the in-house resources to rapidly respond to your requirements, you know that if we say we can offer the service, we'll deliver it professionally and promptly.

## HOW WE HELP YOU

The experienced electrical team at Lovegrove is backed by extensive infrastructure and investment in all our services. We invest in training and development, giving us complete confidence to work on any electrical project that falls under our broad range of capabilities.

The structure we've put in place is proven, with individual team leaders, supervisors, policies, procedures, and a high level of management allowing us to take full control of a project. Communication is the key. We regularly meet with our clients and consultants in order to engage at all levels throughout your business. It's a true proactive approach; we'll analyse your site, plan a solution, complete it successfully and provide ongoing maintenance.

## COMMERCIAL & INDUSTRIAL ELECTRICAL

Our commercial electrical capabilities range from fast food outlets, childcare centres, urban developments, retail outlets, retail fuel systems for petroleum sites and general electrical for convenience stores. We also have years of success working on design & construct of bulky goods developments, manufacturing, and processing plants.

## HAZARDOUS AREA ELECTRICAL

Hazardous area electrical work requires a higher level of license requirements, technical knowledge, and safety aptitude, that underpin the advanced capabilities at Lovegrove. Leave it to us and we'll safely execute the design, installation, testing and commissioning of all hazardous area electrical systems.

## ELECTRICAL MAINTENANCE

Who better to safeguard the long-term performance of your asset than the people who designed and built it? Our intimate project knowledge allows us to take on routine and preventative maintenance on many of the projects we've delivered, with 24-hour callout capability.

## COMPLETE THE JOB

Electrical work is just one component of our capabilities. We've got the proven knowledge and modern technology to deliver end-to-end solutions across multiple industries.
