COMPLETE CONFIDENCE | EC581

# YOUR COMPLETE RENEWABLES SOLUTION

Renewable energy is the modern answer to powering your business efficiently and cost effectively. When it comes to delivering the highest quality renewable energy generation, and energy-efficient strategies, you need a partner you can trust.

Lovegrove provides the next generation of renewable energy solutions, with the ability to deliver any scale project from design to completion. Through our strategic partnerships, and our rare ability to work in tandem with our civil, construction and commercial electrical divisions, we can provide a tailored solution for the ultimate return on your investment.

With our head office in Western Australia, regional office in South Australia, and contracting licences in all states and territories, we're confident of delivering commercial and industrial projects across Australia.

## KNOWLEDGE IS POWER

The Lovegrove renewable energy division has developed an in-house team of fully trained and qualified professionals with decades of industry experience. Our personnel keep up to date with training programs to ensure we approach every project with the highest level of innovation and safety.

Installing commercial systems through to utility scale systems, including off grid solutions and micro grid projects. Lovegrove has positioned itself to deliver any scale project and see it through.

## HOW WE HELP YOU

Lovegrove works with the corporate business, local government and the resources sector to develop high quality energy reduction strategies. Storage and production of renewables are the future; the natural shift in business efficiency, whether you need an alternative to fuel generators on a remote site, smarter car-charging systems, or a cost-effective way to manage your power consumption.

## DESIGN AND PLANNING

Let us help you design a next generation renewable energy solution, utilising the latest on and off grid solar generation and battery storage technology.

We are working closely with our strategic partners to integrate hydrogen storage for the mobility and stationary energy sectors.

## PROJECT MANAGEMENT

The Lovegrove multidisciplinary team can manage your entire project. Our infrastructure, personnel, training and development allows us to combine our electrical, civil and renewable energy skills, streamlining the entire project from one point of contact.

## INSTALLATION AND MAINTENANCE

We can install, test and maintain your grid connect and off grid renewable energy system.

## COMPLETE THE JOB

Renewable energy is just one component of our complete capabilities. We have the proven knowledge and modern technology to deliver end-to-end solutions across multiple industries.
